Study BS Nursing by Subject: All Semesters and Learning Guides

Prepared by: Faizan, BS Nursing

Study BS Nursing by subject or semester. Find the nursing subjects in the revised 2024 BSN curriculum, then open the topic guide, questions and existing clinical resources. You do not need to search through chapter-by-chapter notes. The same subject may serve more than one semester, but each course section has its own assigned learning outcomes.

View the full 8-semester BS Nursing curriculum | Practice Nursing MCQs

Core Year 1 nursing subjects

- Microbiology (Semester 1): microorganism types, infection transmission, microbiota, infection prevention and microbiology questions. Practice MCQs.
- Biochemistry (Semester 1; MCQ practice available): carbohydrates, proteins, lipids, enzymes, hormones, metabolism and laboratory context. Practice MCQs.
- Fundamentals of Nursing (Semesters 1 and 2): distinct Fundamentals I and II sections, the nursing process, patient safety, clinical assessment and communication. Practice MCQs.
- Anatomy & Physiology (Semesters 1 and 2): Anatomy I and II body-system learning sections, homeostasis, labeled anatomy and explained questions. Practice MCQs.

MY NURSING HUB

Choose a nursing subject or clinical topic

These pathways open published learning resources. Subjects without a standalone study guide lead to the official course directory, rather than an empty notes page.

Pharmacology and medication safety

Study nursing dosage calculations and medication administration safety.

Medical-Surgical Nursing

Start with the nursing care plan library, lung sounds assessment, and stroke nursing guide.

Maternal and Child Health

Locate maternal, newborn and pediatric learning outcomes using the BS Nursing curriculum subject directory.

Mental Health Nursing

Find the mental health nursing course and related learning outcomes in the BS Nursing curriculum directory.

Community Health Nursing

Use the curriculum directory to locate community and public health nursing courses and required competencies.

Critical Care Nursing

Explore vital signs assessment and escalation and the clinical procedures library.

Nursing Research

Locate nursing research methods, expected learning outcomes and course placement in the BS Nursing curriculum directory.

Clinical Lab Values

Open normal lab values for nurses and interpreting lab results.

MY NURSING HUB

Nursing Process (ADPIE)

Study the ADPIE process and care planning section in Fundamentals of Nursing.

Find subjects in later semesters

For higher-semester subjects, use the existing semester directories until subject-level learning guides are ready. Do not mistake prerequisite topics for separate courses assigned to a semester.

- Semester 1 curriculum and subjects
- Semester 2 curriculum and subjects
- Semester 3 curriculum and subjects
- Semester 4 curriculum and subjects
- Semester 5 curriculum and subjects
- Semester 6 curriculum and subjects
- Semester 7 curriculum and subjects
- Semester 8 curriculum and subjects

Explore connected nursing learning resources

- Normal Lab Values for Nurses and Lab Interpretation

- Nursing Care Plans with worked learning examples
- Clinical Procedures and Nursing Skills
- Nursing MCQs by topic
- NCLEX Preparation
- Lung Sounds and Nursing Assessment

How to use the BSN subject library

- Choose your semester or subject.
- Read the section for the course actually assigned to your semester.
- Use the linked diagrams, clinical guides and case-based explanations to learn the application.
- Check your understanding through the linked MCQs and short or long-answer questions.

The curriculum source is the HEC Revised BSN Curriculum (2024). University-approved course arrangements can vary; verify your institution’s current scheme for your cohort.
